

Turn up your emotions

In 2015, the first Tracer 900 changed the Sport Touring class forever. With its torque-rich CP3 engine, sporty chassis and all-round versatility, it became the bike of choice for over 50,000 European riders who wanted an agile and exciting multi-role motorcycle with plenty of attitude. Perhaps no surprise then that it's the best-selling bike of its class.

Equipped with a more powerful, larger-capacity engine, as well as a redesigned aluminium Deltabox chassis – and now featuring the most sophisticated electronic rider aids from the R1 supersport bike – the new TRACER 9 is Yamaha's most thrilling and capable Sport Touring bike.

Sportier, lighter and easier to live with, the TRACER 9 is the kind of bike that's always ready to do what you want and take you wherever you desire. With even higher specifications and athletic new bodywork, increased luggage capacity and a stronger all-round performance, this premium sport tourer is ready to take on the world.

- EU5 890cc CP3 engine
- Lightweight CF aluminum die-cast frame
- Full three-bag luggage capability
- 6-Axis IMU plus lean-sensitive rider aids
- Next-generation design and styling
- Full LED lighting
- Twin 3.5" TFT meters
- Lightweight Spin Forged wheels
- adjustable suspension
- 2-position adjustable seat
- Aerodynamic fairing
- Cruise control system

Turn up your emotions

Introducing the dynamic new TRACER 9 from Yamaha. Lighter, quicker and more versatile than ever before – and featuring sleek new aerodynamic bodywork with enhanced ergonomics – this premium next-generation Sport Touring model is built to transport you and a passenger as far as your imagination can take you.

Europe's best-selling Sport Touring model has been completely redesigned, with a larger-capacity 890cc three-cylinder engine producing even stronger torque for intoxicating acceleration. Whether you're pushing hard on twisty mountain roads or covering large distances on the highway, the new lightweight chassis ensures sports bike agility with tourer stability, when riding both solo and two-up.

A new six-axis IMU governs the lean-sensitive electronic rider aids, which give precise control in a variety of surface and weather conditions, while twin TFT meters and full LED lighting underline this versatile sport tourer's premium specifications. With full three-bag capacity and a 350 km plus range, the TRACER 9 is built to turn up your emotions and carry you into to a new world.

EU5 890cc CP3 engine

Developing higher levels of linear torque at lower rpm, the new larger-capacity 890cc liquid-cooled CP3 engine produces remarkable acceleration and thrilling corner exit speeds, making this the sportiest TRACER 9 ever. Optimised gear ratios plus the refined A&S clutch deliver super-smooth performance – and the glorious growl from the new twin-tail exhaust and redesigned intake system amplifies the thrill of every ride.

Lightweight CF aluminum die-cast frame

The next generation TRACER 9 is equipped with a newly-designed CF die-cast aluminium Deltabox frame providing higher levels of rigidity that gives sport bike agility with sure-footed stability. The redesigned aluminium swingarm is 64mm longer to ensure excellent high speed stability without compromising the bike's nimble handling character.

Full three-bag luggage capability

For increased versatility and convenience, the TRACER 9 offers you the option of fitting a total of three hard luggage cases, enabling you and your passenger to take a full set of luggage along with you on every road trip. With a 7% increase in load-carrying capacity, this dynamic Sport Touring bike can handle a 193 kg load.

6-Axis IMU plus lean-sensitive rider aids

TRACER 9 is now equipped with some of the most advanced electronic rider aids, to give you added confidence and precise control in different weather and road surface conditions. Developed from the R1M, the compact six-axis IMU governs a lean-sensitive three-mode Traction Control System (TCS), as well as a Slide Control System (SCS), front wheel LIFt Control System (LIF) and Brake Control system (BC).

Next-generation design and styling

Its new compact and aerodynamic body design gives the TRACER 9 a modern and impressive appearance that perfectly conveys the bike's exciting sporting character and versatile touring capabilities. The lightweight fairing enhances your riding comfort over long distances, while the 18-litre fuel tank gives a 350 km+ range between fuel stops.

Full LED lighting

Compact LED lighting is featured throughout the TRACER 9. Separate high/low mono-focus headlights give the bike a dynamic new look and provide superior illumination in any situation. LED flashers reinforce the bike's premium status, while the signature TRACER family taillight enhances the bike's lightweight looks and sporty feel.

Engine

Engine type	Liquid-cooled;4-stroke;4-valves;3-cylinder;DOHC
Displacement	890
Bore x stroke	78 x 62.1 mm
Compression ratio	11.5:1
Maximum power	87.5 kW (119 PS) @ 10,000 rpm
Maximum torque	93.0 Nm (9.5 kg-m) @ 7,000 rpm
Lubrication system	Wet sump
Clutch type	Wet;Multiple Disc
Ignition system	TCI
Starter system	Electric
Transmission system	Constant Mesh;6-speed
Final transmission	Chain
Fuel consumption	5.0 L/100km
CO2 emission	116 g/km
Fuel system	Electronic Fuel Injection

Chassis

Frame	Diamond
Caster angle	25° 00'
Trail	108 mm
Front suspension system	Telescopic fork
Rear suspension system	Swingarm
Front travel	130 mm
Rear travel	137 mm mm
Front brake	Hydraulic dual disc, Ø 298mm
Rear brake	Hydraulic single disc, Ø 245mm
Front tyre	120/70Z R17 M/C (58W) (Tubeless)
Rear tyre	180/55Z R17 M/C (73W) (Tubeless)

Dimensions

Overall length	2,175 mm
Overall width	885 mm
Overall height	1,430 mm - 1,470 mm
Seat height	810 mm - 825 mm
Wheel base	1,500 mm
Minimum ground clearance	135 mm
Wet weight (including full oil and fuel tank)	213 kg
Fuel tank capacity	18 L
Oil tank capacity	3.5 L
